

THE NEW TOYOTA PROACE CITY

Toyota gains first-time presence in the crucial compact van segment

- Short and long panel vans with multiple best-in-class qualities: -
 - Load length
 - Load volume
 - Payload
 - Towing capacity
 - Engine efficiency
- Ingenious Smart Cargo system increases load-carrying capacity
- Advanced equipment features for safety, connectivity and convenience

The all-new Proace City marks Toyota's entry into the compact van segment, a product that ticks all the boxes when it comes to customers' priorities for a vehicle that can do the job, without a question.

It boasts an impressive list of best-in-class qualities, not least where basic load-carrying ability is concerned. That goes for load volume, load length and payload performance, plus a 1.5-tonne towing capacity. The diesel powertrains on offer to UK customers are among the most efficient in the model's segment across the board, in terms of both fuel economy and CO₂ emissions – performance that contributes to Proace City's strong cost-of-ownership profile.

Toyota knows that for business people today, a van often has to serve as a mobile office as well as a means of transport. With connectivity features, impressive active safety systems and a cabin designed for flexibility and ease-of-use, Proace City conveniently doubles as a well-equipped place of work.

Developed in partnership with Groupe PSA, the new model will make a critical contribution to Toyota's growth targets for its renewed LCV line-up, alongside the Hilux pick-up, Proace medium duty van and Land Cruiser Commercial. It forms a perfect fit with the established Proace, in terms of size and load volume.

Toyota's European LCV sales totalled 66,560 units in 2019. With the introduction of Proace City, it aims to increase the LCV share of its sales mix in the region from six to 10 per cent.

Toyota's current range of Proace medium duty vans and the "indestructible" Hilux pick-up give it representation in 37 per cent of the European LCV market, but the addition of Proace City will bring the brand into the valuable compact van segment. This currently accounts for more than one third (35.4 per cent, 822,000 annual sales) of the LCV market. Overall, Toyota predicts the total LCV market will reach 2.5 million annual sales by the end of 2020.

A VAN THAT'S FIT FOR THE JOB

- Best-in-class for payload (1,000kg) and towing capacity (1,500kg)
- Long and short versions, both with best-in-class cargo length capacity
- Short version has best-in-class load capacity, capable of carrying two Europallets
- Smart Cargo system increases usable load space

Toyota makes a robust entry into the compact panel van market with the new Proace City boasting best-in-class qualities in terms of cargo length, cargo volume, payload and towing ability. The van is available in short (4,403mm) and long (4,753mm) forms – the latter being both longer overall and having a longer wheelbase (2,975 vs 2,785mm).

Both the short and long versions have a cargo area that's big enough to accommodate two Europallets. Respective load volumes are 3.3 and 3.9m³, while the one-tonne payload is up to 350kg greater than some rivals.

If that carrying ability is insufficient, Proace City also has a best-in-class towing ability, hauling loads of up to 1.5 tonnes with a braked trailer.

Smart Cargo

Proace City is available with either two individual front seats or a driver's seat and two-seat bench, the latter with the Smart Cargo option, a handy space-busting feature that's been adopted from the larger Proace medium duty van.

The Smart Cargo system uses a folding outer passenger seat and a hatch in the bulkhead to gain an extra 0.4m³ of load space and to increase maximum load length by 1.3m so that

items such as ladders and piping can be carried with ease. The passenger seatback closest to the driver can also be folded over to form a desktop. With Smart Cargo, the short version of Proace City adds best-in-class load volume to its list of segment-leading qualities.

The system also allows the centre passenger seatback to be rotated to create a handy desk space, together with additional under-seat storage.

POWERTRAINS WITH EXCELLENT EFFICIENCY

- Two diesel engine options, both with stop-start technology
- Strong fuel efficiency and CO₂ emissions

The line-up of two 1.5-litre diesel units – badged 75hp and 100hp – delivers performance that rivals the best in its class in terms of both fuel economy and CO₂ emissions. Both engines are matched to a five-speed manual transmission

WLTP test cycle Data for the 1.5 75hp powertrain indicates CO₂ emissions from 145 to 150g/km and combined cycle fuel economy from 49.56 to 51.36mpg. With the 1.5 100hp unit, the figures are 148 to 160g/km and 46.31 to 50.44 mpg for the short model; and 150 to 160g/km and 46.31 to 49.56mpg for the long version.

Maintenance schedules are up to 25,000 miles/two years, reflecting the vehicle's built-in reliability. All new Proace City vans are covered by a comprehensive five-year/100,000-mile manufacturer's warranty and residual values are expected to be strong, in line with those achieved by the Proace medium-duty van.

SAFE, CONNECTED AND EASY

- Safety pack available for best-in-class protection
- Connectivity and infotainment system

Today's business people need their van to be much more than simply a means of transport; often it also has to serve as their office when they are on the move. The new Proace City reflects customer priorities for safety connectivity and ease of use with design and

equipment features that raise the vehicle's all-round practicality and functionality to a higher level.

Safety features

Proace City adopts some of the latest active safety and driver assistance systems found on passenger cars, ensuring the driver is warned of imminent collision risks and given automatic, immediate support to help avoid an accident or lessen the consequences if an impact happens.

The optional safety pack for the Proace City Icon models includes a Pre-Collision System, Road Sign Assist, Lane Departure Alert and a “coffee cup” alert that recommends the driver take a break if they have spent a long time at the wheel.

Safety and ease of manoeuvring are supported by a reversing camera and front and rear parking sensors, fitted as standard to Icon grade models.

Connectivity and infotainment

The package of connectivity and infotainment features available for the new Proace City gives owners what they need to keep in touch while on the move. Simple, central control of audio and smartphone functions is provided by a eight-inch touchscreen, with phone integration made easy on Icon grade models via Apple CarPlay and Android Auto. Bluetooth and USB connections are also provided.

Making life easy

Proace City has been designed for ease-of-use throughout, going beyond the fundamental benefits of its capacious, easy-to-access loadspace to cover the details that make for comfortable, relaxed day-to-day driving.

As an example, the electric parking brake isn't just useful, it also frees up more legroom for the centre passenger when the two-seat front bench is fitted. The same kind of thinking has produced 16 different storage points around the cabin, ranging from a small coin holder and cup holders to a 15-litre space in the centre console.

UK model range and equipment

Proace City was launched in the UK with a five-model line-up featuring two equipment grades and two body lengths.

The equipment specification for the Active models – entry point to the range – includes air conditioning, automatic headlights, heated, power-adjustable door mirrors, one-touch power windows, twin sliding side doors, 180-degree-opening rear doors, DAB audio with USB port

and Bluetooth, full-size spare wheel, rubber floor covering in cargo area and a full metal bulkhead.

Icon grade features include: multimedia system with eight-inch touchscreen, smartphone integration with Apple CarPlay and Android Auto, Smart Cargo system, three front seats, automatic wipers, electronic parking brake, reversing camera, front and rear parking sensors, power-folding door mirrors, cruise control with speed limiter, front fog lights and cornering lights.

Options for Active models include the Smart Cargo system in a package that also includes the electronic parking brake, driver's seat lumbar support and slide/recline adjustment of the passenger two-seat bench. For Icon models, a Toyota Safety Sense package can be specified together with 3.5-inch colour multi-information display, immobiliser and alarm. Both grades can be specified with a tow bar.

The 75 and 100hp engines are available for both grades in short body form; the long body is available only in Icon trim, with the 100hp powertrain.
