

TOYOTA FSC CONCEPT

A new-category vehicle model that evolves and combines the elegance of a sedan and the utility of a minivan

Under the design philosophy of "Vibrant Clarity", the FSC creates a new feeling of quality in a revolutionary form that is neither a sedan nor a minivan.

The interior accommodates four adults in comfort and is characterized by a power-adjustable rear space that can flexibly adapt to various needs. The cockpit's instrument panel has a flowing shape and the rest of the interior features illumination that creates a comfortable ambiance. The vehicle is fitted with an innovative, smart rear hatch and advanced touch-operated functions.
