

10th October 2007

Concept Car iQ AT THE TOKYO MOTOR SHOW

The Concept Car iQ overturns the conventions of automobile design by offering ultra-efficient packaging aimed at reducing CO₂ emissions. This ultra-compact vehicle maintains the status of a premium automobile even with its exceptionally short length of less than three metres.

- Allows for three adults and one child (or luggage) to fit comfortably inside, due to its ultra-efficient packaging, despite a compact appearance.
- Offers a surprisingly creative interior.
- Emphasizes power and stability through its exterior thanks to a short length and comparatively wide body.

Concept	Total length (mm)	Total width (mm)	Total height (mm)	Wheelbase (mm)	Seating Capacity
Concept Car iQ	2,980	1,680	1,480	2,000	4
