

TOYOTA PROACE VAN

Toyota extended customer choice and opened up a new market proposition with its range of Proace Vans. A choice of three grades, three body sizes and two wheelbase lengths are available, together with different body styles that take Proace into all areas of the medium duty van (MDV) segment.

A combi version seating up to nine and a platform cab ready for conversions are also available in a range that greatly extends the model's established market reach. The Crew Cab provides a useful balance of extra seating – a rear three-seat bench – plus practical load space.

The UK range features 101bhp/75kW and 118bhp/88kW 1.5-litre diesel engines (badged 1.5D 100 and 120) and 142bhp/106kW and 174bhp/130kW 2.0-litre units (badged 2.0D 140 and 180). All feature six-speed manual transmission, apart from the 180 which uses an eight-speed automatic.

Specification highlights include three front seats and the availability of a Smart Cargo system, which features an opening bulkhead and lifting front passenger seat base to increase load length capacity by 1,162mm and overall load volume by an extra half a cubic metre.

Design and Packaging

Proace Van's strong frontal design clearly marks it out as a member of the contemporary Toyota family. It is available in a choice of two body sizes: Medium and Long.

The Medium version is 4,959mm long and has a 3,275mm wheelbase. The Smart Cargo system combines an opening front bulkhead with a lifting front passenger seat base mechanism, increasing the maximum load length to 3.67m and total load volume to 5.8m³. It also creates additional storage space in the cabin.

The medium-length Proace Van is available in Panel, Crew Cab, Glass Van, Combi and Platform Cab versions.

The Long version of Proace Van has the same 3,275mm wheelbase, but with an extended rear overhang that takes overall vehicle length to 5,309mm. The cargo area measures 2,862mm long and 1,628mm wide, giving a load volume of 6.1m³. Here the Smart Cargo system in the panel vans takes maximum load length to 4,026mm, increasing load capacity to 6.6m³.

With each vehicle length, Proace Van benefits from left and right side sliding doors and side-hinged rear double doors that open to 180 degrees. Maximum payload is up to 1,400kg and the braked trailer towing capacity is up to 2,500kg. The side door aperture is wide enough for Euro pallets to be loaded.

The cabin is robust, functional and spacious, designed to meet the needs of both commercial and private owners. The dashboard features clear instrumentation and analogue dials with ergonomic switchgear. The driving position is car-like and affords excellent visibility, with a short-throw gear lever mounted close to the steering wheel.

UK grade structure, equipment and options

Proace Van is available in three equipment grades: Active, Icon and Design. The Combi nine-seater (classed as a passenger vehicle in the UK) has its own, dedicated specification.

The Active grade provides the Smart Cargo system, central remote locking with deadlocks, alarm, cruise control with speed limiter, fabric seat upholstery, driver and front passenger airbags, air conditioning, power windows and door mirrors, four-speaker audio system with radio, DAB, USB port and Bluetooth, smartphone integration (Apple CarPlay and Android Auto) and a tyre pressure monitor.

Icon grade adds more sophisticated cabin acoustic treatments for a quieter environment, including an acoustic windscreen, driver's seat height adjustment, air conditioning, a cooled and illuminated glovebox and additional 12V power outlets in the glovebox and cargo area. Full wheel covers, satellite navigation and a dashboard information display are also included in the specification.

Design grade is distinguished by chrome side bars, body-colour bumpers and door mirror casings, front fog lights and 17-inch alloys. It also provides the Toyota Pro Touch multimedia system plus front parking sensors, a blind spot monitor, auto-folding door mirrors and keyless entry. Toyota Safety Sense is also part of the specification, equipping the Proace with a Pre-Collision System with pedestrian detection and Adaptive Cruise Control.

The standard specification for the nine-seat Combi includes three front seats, six further seats in two rows, driver's seat armrest, driver and passenger front airbags, air conditioning, cloth upholstery, central locking, cruise control with speed limiter, 12V dashboard power outlet, 16-inch steel wheels, tyre pressure monitor, power windows, twin sliding side doors, glazed rear doors, Vehicle Stability Control and Hill-start Assist Control. The powertrain features the 120bhp 1.5D turbodiesel engine with stop and start and a six-speed manual transmission.

A tailgate can be specified in place of the twin rear doors on medium and long Comfort versions of the Proace Van (excepting the 94bhp 1.6 diesel version).

Powertrains

Proace Van is available with 1.5 and 2.0-litre diesel engines with a range of power outputs and choice of different transmissions.

The 101bhp/75kW (badged 100hp) version of the 1.5 unit is matched to a six-speed manual gearbox and produces 270Nm of torque, while a 118bhp/88kW (badged 120hp) version of the same engine musters a maximum 300Nm of torque.

The 142bhp/106kW 2.0-litre turbodiesel engine (badged 140hp) is recommended for vans carrying higher payloads, thanks to its higher torque – a maximum 340Nm. The more powerful, 174bhp/130kW, version of the 2.0-litre diesel (badged 180hp) is equipped with eight-speed automatic transmission as standard.

All powertrains are equipped with selective catalytic reduction to reduce the amount of NO_x released into the atmosphere. Details of fuel consumption and CO₂ emissions are provided in the technical specifications table below.

A 22.5-litre tank of AdBlue ensures the system will work to its optimum capability for about 9,300 miles (15,000km), with usage varying according to driving style and conditions. The tank is easy to refill, via a filler inlet on the inside of the centre pillar, accessible when the driver's door is open.

Up to 10 years/100,000 miles warranty

In common with every new Toyota, Proace is eligible for Toyota warranty protection for up to 10 years or 100,000 miles (whichever comes first). This comprises an initial three-year manufacturer warranty, followed by up to a further seven years of service-activated warranty.

For the first three years of the car's life, owners can have it serviced at a place of their choice. When the new car warranty period expires, they can then benefit from an additional 12 months (or 10,000 miles) warranty when their vehicle has a qualifying service at an authorised Toyota workshop. The warranty is provided at no extra cost, up to a limit of 10 years/100,000 miles. Terms and conditions apply; full details are available at www.toyota.co.uk.

In common with all other Toyota Professional light commercial vehicles, new Proace models come with five years' free roadside assistance.

PROACE VAN TIMELINE AND UK SALES

YEAR	MONTH	EVENT
2012	October	Toyota announces the new Proace medium duty van, developed in a co-operative project with the PSA Group.
2013	April	UK range, specifications and pricing are announced.
	July	Official start of UK sales.
2015	December	Toyota and PSA Group announce they will co-operate on new LCV models, including a new Proace Van and a Proace Verso MPV.
2016	April	The new Proace Van makes its world debut at the Commercial Vehicle Show in Birmingham. The line-up includes a new Compact version and new 1.6 and 2.0-litre diesel engines. UK model range, specifications and prices are announced.
	July	Official start of UK sales of new Proace Van.
	December	Proace is named <i>What Van?</i> LCV of the Year.
2018	October	New grade structure introduced – Active, Icon and Design. Introduction of more powerful, 174bhp 2.0-litre engine with automatic transmission.
2019	May	Proace adopts a new 118bhp 1.5D engine with six-speed manual transmission.
2021	August	Smart Cargo made standard on all Proace Van models.
	October	2.0-litre 120 engine is upgraded to 140 (142bhp).
2022	January	2.0-litre 180 engine with eight-speed automatic is added to the range.
	December	2023 Proace models gain Apple CarPlay/Android Auto smartphone integration as standard.

Sales in UK markets in 2022: 1,453

Cumulative UK sales since launch (2013): 14,532
